

A woman in a black dress stands in a dark room, illuminated by three bright circular lights. The scene is overlaid with a large, semi-transparent watermark that reads 'Halstack' in a stylized font. The overall color palette is a warm, golden-yellow.

Body Dryer

*Changing the
way people dry*

After ten years of supplying body dryers to the leisure industry, Haystack are delighted to introduce their latest addition to the range, the revolutionary new Club Dryer.

Our unique product provides an opportunity for you to offer your customer the most luxurious and environmentally friendly way to dry and extend the experience of outstanding quality into your changing rooms!

You

Financial Benefits

- As a value added service to recruit and retain new members or as an income generation tool, the body dryer has an amazing track record on improving our clients' bottom line.
- The dryers economical design means it is more energy efficient and cost efficient than towel laundry, allowing you and your customers to make substantial savings.

Environmental Benefits

The body dryers' low power consumption and proven design ensures, that aside from saving on energy costs, it offers a unique opportunity to reduce your facilities carbon footprint. The CO₂ output from using the body dryer is a fraction of that for normal towel usage.

Added Value

- Stand out from the competition
- Quicker changing room throughput
- Cleaner, dryer changing areas
- Positive changing experience

Your Customer

Lasting Luxury Experience

As your customers stand in front of the infra-red lamps, their body is gently dried by the warm air being circulated around them. This adds a unique, luxurious feeling to the changing experience leaving your customers completely dry and relaxed.

Ease and Convenience

Customers will enjoy the opportunity to shower, dry quickly and dress easily, before leaving with a lasting positive feeling of your facility, without the inconvenience of wet towels.

Operational Aspects

Our dryers can be activated by a wide variety of systems including coin, token, RFID or button so there is always a perfect solution for your facility.

The compact design ensures that our dryers can fit into even the smallest of changing rooms and the minimal maintenance requirements ensure the dryers are a hassle free addition to improve your facilities services.

Environmental Input

Give your members an opportunity to improve their own carbon footprint by reducing their personal towel laundry.

Less Able Users

The body dryer is completely DDA* and ADA** compliant, which will allow your less abled clients to dry easily and independently.

**Disability and Discrimination Act*

***Americans with Disabilities Act*

“Our dryer’s are an integral part of our business and customer experience.”
